Montréal, QC, H3C 3P8, Canada

Current position

2025– Associate Professor, Department of Economics, ***Université du Québec à Montréal (UQAM)***, Canada
2020–2025 Assistant Professor, Department of Economics, ***Université du Québec à Montréal (UQAM)***, Canada

Other affiliations

Fellow, ***RFBerlin***, Germany *2025–*
Member, ***Centre on Population Dynamics***, Canada *2025–*
Co-founder, ***Développement économique et inégalités des territoires (DEIT) research team***, Canada *2023–*
Affiliate Researcher, ***DIAL (Centre National de la Recherche Scientifique/Institut de Recherche pour le Développement/Université Paris-Dauphine)***, France *2018–*
Fellow, ***Institut Convergences Migrations***, France *2018–2025*

Past positions

2017–2020 Vice-Chancellor's Fellow, **University of Bristol**, U.K.

Research fields

Primary: **Urban Economics, Development Economics**
Secondary: Labor Economics, Economic History, Economic Geography

Academic research

Publications

Migrants and Firms: Evidence from China (*American Economic Review*, 112 (6): 1885-1914, 2022; Latest Version, Appendix), joint with C. Imbert, Y. Zhang, and Y. Zylberberg.
Industrial clusters in the long run: Evidence from Million-Rouble plants in China (Forthcoming, *Review of Economic Studies*; Latest Version, Appendix, NBER WP), joint with S. Heblich, H. Xu, and Y. Zylberberg.
Persistence Despite Revolutions (Forthcoming, *Review of Economic Studies*; Latest Version, NBER WP), joint with A. Alesina, D. Yang, Y. You, and W. Zeng.

Working papers

Floating population: migration with(out) family and Chinese economic development (Latest Version, CEPR WP), joint with C. Imbert, J. Monras, and Y. Zylberberg.
Random river: Trade and rent extraction in imperial China (Latest Version).
Migrants' Beliefs and Investment (WP).

Education

2013–2017	PhD in Economics, **Paris School of Economics** and **École Normale Supérieure**, Paris. Dissertation: "Three Essays on the Economics of Migration" | Supervisor: Flore Gubert *Jury*: Sylvie Démurger (CNRS, Lyon), Richard B. Freeman (Harvard, NBER), Marc Gurgand (CNRS, PSE), Alice Mesnard (City U. of London)
2016–2017	Associate of the Department of Economics at **Harvard University**, U.S.A. Visiting Scholar at the **National Bureau of Economic Research**, U.S.A.
2015	International Ph.D. Student Attachment Programme at the **Hong Kong Polytechnic University**, China
2010–2012	Master's degree in Economics with distinction *magna cum laude*, **Paris School of Economics**, Paris Graduate student exchange, Department of Economics, **University of California, Berkeley**, U.S.A.
2009–2010	Master's degree in Economics with *Distinction*, **SOAS, University of London**, U.K.
2005–2010	Bachelor's in Chinese language and civilisation with *Mention Bien*, **Institut National des Langues et Civilisations Orientales**, France
2006–2008	Master's degree in Public Policy, **Sciences Po**, Paris
2007	Admitted to **École Normale Supérieure**, Paris (through a national competitive exam)

Work experience

UQAM, Canada *2020–*

Courses taught: Development Economics (grad), Dissertation writing (grad), International Trade (undergrad), Microeconomics (undergrad), International Economic Relations (undergrad).

University of Bristol, U.K. *2017–2020*

Vice-Chancellor's Fellow (post-doc): Research in economics — please refer to Section Research below; founder and organiser of *Flickonomics*, the economics film club of the University of Bristol, financed by two grants from the Teaching Innovation Fund.

Harvard University and ***NBER***, U.S.A. *2016–2017*

Arthur Sachs Fellowship (paid by Harvard University).

Status: *Associate of the Department of Economics* (Harvard University) and *Visiting Scholar* (National Bureau of Economic Research).

Sciences Po (Paris), *Europe Asia Campus*, Le Havre, France *2014–2015*

Professor (design of syllabus, course material, and exams; teaching) of mathematics (24 hours) and statistics (96 hours).

École Normale Supérieure and ***Paris School of Economics***, France *2013–2016*

Paid doctoral contract with École Normale Supérieure.

World Bank, Cambodia and Lao P.D.R. *2013–2015*

Consultant (298 days).

Cambodia and Lao P.D.R. *2013–2015*

Research: Desk research, qualitative field research, survey design (original strategy to establish a sampling frame and extract a representative sample of the population), questionnaire design, data analysis, and final report; study financed by the Umbrella Facility for Gender Equality.
Operational: Project proposal, budget design, hiring of enumerators, coordination with local counterparts (ministries, border checkpoints, and village chiefs), coordination with the survey team, managing of enumerators in both countries.

Cambodia *2014*

Firm data analysis and writing for the *Cambodia Investment Climate Assessment* (2014).

Lao P.D.R. *2013*

Research: Data analysis and writing for the *Lao Development Report 2014*; design, analysis, and writing of the background research paper "Labor Market Structural Transformation" (wage evolution decomposition, assessment of sectoral mobility magnitude and impact, urbanisation and migration), and for the 3rd *Lao PDR Investment Climate Assessment* (2014) (analysis of firm data on business performance and challenges, international comparisons using micro and macro data, and analysis of qualitative data that I had collected).
Operational: Coordination with local counterparts (ministries and Lao Statistics Bureau), and qualitative interviews with experts and high-ranking officials.

China Development Research Foundation, Beijing, China *2013*

Consultant (320 hours). Production of a report on city clusters and on rural-urban migration ("floating population") in China.

Centre National de la Recherche Scientifique, France *2012*

Research assistant (1 month). Research on the impact of land administration programs on agriculturalproductivity and rural development (in terms of agricultural productivity, environmental sustainability, health, etc.). Project led by Karen Macours, Jérémy Gignoux, and Liam Wren-Lewis (École d'Économie de Paris, CNRS).

Innovations for Poverty Action, Morocco *2011*

3-month internship.
Research: Implementation of a survey on savings behaviour in rural and urban areas, as part of the Microsavings & Payments Innovation Initiative. Qualitative and quantitative

data collection, econometric analysis, final report.
Operational: Hiring of enumerators, budget, coordination with government (*Ministère de l'Intérieur*, local authorities, village chiefs), and management of enumerators in the field.

Peking University, Beijing, China *2009*

Professor (design of syllabus, course material, and exams; teaching) of French language and literature (120 hours).

Beijing Language and Culture University Press, China *2009*

Translator (50 days) of a Chinese language textbook.

Institut Français des Relations Internationales (IFRI), *2008*
Paris, France

1-month internship. Organisation of the 1st World Policy Conference (international conference on global governance).

Le Point, weekly magazine, Paris, France *2008*

1-month internship. Investigation journalism on economic and environmental issues.

French Embassy, Hanoi, Vietnam *2007–2008*

4-month internship. Assessment of cooperation and development projects presented by French organisations in Vietnam. Organisation of the French Presidency of the Council of European Union in Vietnam.

Bureau of Foreign Affairs, Huế, Vietnam *2007*

2-month internship. Organisation with the local government of the 27th *Assemblée générale de l'Association Internationale des Maires Francophones*.

École Normale Supérieure, Paris, France *2007–2013*

Élève fonctionnaire stagiaire: Temporary civil servant contract (paid to study). Admitted through a national competitive exam.

Research

Migrants and Firms: Evidence from China (*American Economic Review*, 112 (6): 1885-1914, 2022; Paper, Appendix), joint with Clément Imbert (Warwick), Yifan Zhang (CUHK) and Yanos Zylberberg (Bristol).

How does rural-urban migration shape urban production in developing countries? We use longitudinal data on Chinese manufacturing firms between 2000 and 2006, and exploit exogenous variation in rural-urban migration induced by agricultural income shocks for identification. We find that, when immigration increases, manufacturing production becomes more labor-intensive and productivity declines. We investigate the reorganization of production using patent applications and product information. We show that rural-urban migration induces both labor-oriented technological change and the adoption of labor-intensive product varieties.

Presented at: Harvard Cities and Development Workshop (2019), NBER Summer Institute (2019), Yale Agri-Devo Conference (2017), Harvard China Economy Seminar (2016).

Media coverage: VoxDev (2022).

Industrial clusters in the long run: Evidence from Million-Rouble plants in China (Conditionally Accepted, *Review of Economic Studies*; Latest Version, NBER WP), joint with Stephan Heblich (Toronto), Hao Xu (CCB) and Yanos Zylberberg (Bristol).

We study the impact of large, successful manufacturing plants on other local producers in China, focusing on "Million-Rouble Plants" built in the 1950s during a brief alliance with the U.S.S.R. The ephemeral geopolitical situation and the locations of allied and enemy airbases provide exogenous variation in plant siting. We find a boom-and-bust pattern: Counties hosting these plants were 80% more productive than control counties in 1982 but 20% less productive by 2010. This decline reflects the performance of local establishments, which exhibit low productivity, limited innovation, and high markup. Specialization hindered spillovers, preventing the emergence of new clusters and local entrepreneurship.

Presented at the 2019 Conference on Urban and Regional Economics (CURE).

Persistence Despite Revolutions (forthcoming, *Review of Economic Studies*; Latest Version, NBER WP), joint with Alberto Alesina (Harvard), David Yang (Harvard), Yang You (Harvard) and Weihong Zeng (Xi'an Jiaotong).

Can efforts to eradicate inequality in wealth and education eliminate intergenerational persistence of socioeconomic status? The Chinese Communist Revolution and Cultural Revolution aimed to do exactly that. Using household survey data, as well as newly digitized archival records, we show that the revolutions were effective in homogenizing the population economically in the short run. However, the pattern of inequality that characterized the pre-revolution generation re-emerges almost half a century after the revolutions. Individuals whose grandparents belonged to the pre-revolution elite earn 14 percent more income and have completed more than 11 percent additional years of schooling than those from the rest of the population. We find evidence that human capital (such as knowledge, skills, and values) has been transmitted within the elite families, and social capital embodied in kinship networks have survived the revolutions. These channels allow the pre-revolution elite to rebound after the revolutions, and their socioeconomic status persists despite one of the most aggressive attempts to eliminate differences in the population.

Presented at: NBER Economics of Mobility meeting (2020).

Media coverage: NBER Digest, The Economist (2020), The Economist (2022), Forbes (2022), InequaliTalks (2023).

Floating population: migration with(out) family and Chinese economic development (Latest Version, CEPR WP), joint with Joan Monràs (UPF), Clément Imbert (Sciences Po), Yifan Zhang (CUHK) and Yanos Zylberberg (Bristol).

Migrants around the world leave their spouse or children behind, yet family separation remains absent from standard equilibrium models of migration. We develop and estimate with Chinese data a quantitative spatial model in which rural households choose whether to migrate, which members migrate, and where to migrate. We show that migrant family arrangements respond

to economic opportunities for fathers and mothers and adjust to living costs and migration restrictions at destination in a way that magnifies the aggregate productivity gains from rural-urban migration. We also quantify the effects of gender inequality, of housing, and of migration policies on family migration, productivity, and welfare.
Presented at: VDEV/CEPR/BREAD Seminar (2025).

Random river: Trade and rent extraction in imperial China (Latest Version).
This paper exploits exogenous changes in the course of the Yellow River in China to isolate variation in the natural distribution of economic centers across space. I compute time-varying trade costs and collect original data on population and taxation from dynastic histories and local gazetteers spanning 2,000 years. This allows me to assess the effect of exogenous variation in market access on population density and resource extraction. I find that the changes in connectedness have two opposite effects. First, they induce a very large increase in the level and concentration of economic activity in the shorter run. Second, they trigger a large increase in rent capture by local elites, which severely mitigates the concentration effect in the longer run.

Migrants' Beliefs and Investment (WP).
Migration increases sending households' capacity to invest but introduces additional information asymmetry between household members. In this paper, I establish a new stylized fact: Migrants systematically overestimate assets that they typically invest in and that are held by their households. This is shown using novel data with matched reports from Senegalese migrants and their own households of origin. I find empirical support for a self-selection mechanism: migrants are more likely to sort into investment, the more optimistic they are about their households' trustworthiness, and reject alternative interpretations based on behavioral biases. I finally assess the extent of missing investments: Selection out of investment is large and severely reduces the developmental impact of migration.
An earlier version was awarded the Grand Prix *(first prize) of the International Competition of Master's Degree Theses in Economics and Finance.*

Policy Reports and Publications

2023	**L'évaluation des impacts socio-économiques de la mise en valeur du Lieu historique national du Canal-de-Lachine**, report for Parks Canada. Joint with Kristian Behrens and Florian Mayneris.
2018	**Glass Barriers: Constraints to Women's Small-Scale Cross-Border Trade Publications in Cambodia and Lao PDR**. In P. Brenton and M. Bartley Johns (Eds.), *How Trade Helps Reduce Poverty, and What More Can Be Done*. World Bank and World Trade Organization. Joint with Julian Clarke (World Bank) and Richard Record (World Bank).
2017	**Glass Barriers: Constraints to Women's Small-Scale Cross-Border Trade in Cambodia and Lao PDR**, *World Bank Policy Research Working Paper WPS8249*. Joint with Julian Clarke (World Bank) and Richard Record (World Bank).
2014	**Lao PDR Investment Climate Assessment 2014: Policy uncertainty in the midst of a natural resources boom**. Joint with Richard Record (World Bank), Konesawang Nghardsaysone (World Bank) and George Clarke (Texas A&M).
2014	Background paper for the **Lao Development Report 2014: Expanding Productive Employment for Broad-Based Growth**. World Bank.

Grants and Awards

2023	Research grant	CEPREMAP Digitization of historical narratives to map and study the effects of the Underground Railroad, joint with Lukas Althoff (Stanford/Yale) and Stephan Heblich (Toronto)
2022	Research grant	SSHRC/CRSH Migrants, Cities, and Development: Evidence from China and Ethiopia, joint with Simon Franklin (QMUL), Clément Imbert (Sciences Po), and Yanos Zylberberg (Bristol)
2022	Research grant	IGC Migrants and City Growth: Evidence from Ethiopia, joint with Simon Franklin (QMUL), Clément Imbert (Sciences Po) et Yanos Zylberberg (Bristol)
2021	Research grant	SSHRC/CRSH Neighborhood change and businesses: multinationals, nightlife, and noise, joint with Kristian Behrens (UQAM), Julien Martin (UQAM), Florian Mayneris (UQAM), Amine Ouazad (HEC Montréal), and Farid Toubal (Paris-Dauphine)
2021	Research grant	CEPREMAP Creation of a land classification algorithm using satellite imagery, joint with Clément Imbert (Sciences Po), Xiaolun Yu (Reading), and Yanos Zylberberg (Bristol)
2018	Research grant	BA/Leverhulme Small Research Grant Archival research and collection of data from county gazetteers, for "Industrial clusters in the long run: Evidence from Million-Rouble plants in China
2018	Teaching grant	Teaching Innovation Fund for creating and organizing *Flickonomics*, the economics film club of the University of Bristol
2017	Research grant	Two *Ouvrir la Science Économique* grants, PSE for the "Million-Rouble plants" project for "Revolution or Peristence? Evidence from China's Land Reform and Cultural Revolution
2016	Fellowship	Arthur Sachs, paid by Harvard University grant to visit Harvard University for one year
2015	Research grant	DGEF, Ministère de l'Intérieur for the "Migrant Remittances, Information Asymmetry, and Development (MIRIAD)" randomized control trial project, joint with Flore Gubert (IRD, PSE) and Jean-Noë Senne (Paris-Sud)
2015	Research grant	CEPREMAP for the "MIRIAD" project
2015	Scholarship	International Ph.D. Student Attachment Programme, the Hong Kong Polytechnic University grant to visit the Hong Kong Polytechnic University for 6 months
2013	Award	*Grand Prix* (first prize) of the International Competition of Master's Degree Theses in Economics and Finance
2012	Scholarship	Fellowship for international study at UC Berkeley graduate student exchange program with the Department of Economics

Invited Seminars

2026	Invited panelist at 10th Urbanization and Development Conference, World Bank and Johns Hopkins University, U.S.
